

TERMS & CONDITIONS OF SALE

Liability Disclaimer

Kut Snake and its authorised agents are not liable for any direct or indirect costs, damages, claims, accidents, injuries, death, legal violations (including traffic infringements), or expenses incurred in connection with your vehicle or our products in the following circumstances:

Unauthorised Installation or Purchase

Liability will not be accepted where accessories have been installed by you or by an individual or business that is not an authorised Kut Snake reseller or fitter. A list of authorised resellers is available on our website. While we update this list regularly, new agents may not be listed immediately. If in doubt, please contact Kut Snake for confirmation.

Use in Certain Activities

Kut Snake is not responsible for any issues arising from the use of the vehicle in off-road, motorsport, or any other activities that may contribute to wear, damage, or non-compliance with legal requirements.

Non-Standard or Unroadworthy Vehicles

We accept no responsibility where the vehicle is not roadworthy or has been modified from its original factory specifications. This includes, but is not limited to, modifications to suspension or bodywork.

Impact Damage

Damage resulting from contact with objects such as trees, walls, rocks, other vehicles, or structures is not covered under any circumstances.

Tyre Clearance and Contact Issues

We are not liable for damage caused by tyre contact with flares, vehicle panels, or other parts. It is your responsibility to ensure correct tyre sizing and appropriate suspension modifications to avoid contact.

Automatic Car Wash Damage

Kut Snake does not recommend the use of automatic car washes. We cannot determine the chemicals or equipment used, and therefore cannot accept responsibility for any damage to the flares or vehicle.

Chemical Damage

Exposure to solvents, fuel, degreasers, or other corrosive liquids can damage ABS plastic and paint work. Only use automotive specific car wash products and plastic protectants. If fuel spills occur, rinse the affected area with water immediately and wash the vehicle as soon as possible with suitable automotive products.

Incorrect Attachment Method

Flares must be securely fixed using the supplied screws. Use of 3M tape or any adhesive only method does not comply with Australian Design Rules (ADR). Kut Snake flares are ADR compliant when installed correctly.

UV and Environmental Protection

To minimise fading of ABS plastic components, vehicles should be stored in shaded areas such as carports or garages. For added protection, apply a plastic protectant (e.g., Armor All) regularly.

Tyre and Wheel Sizing

It is the customer's responsibility to seek professional advice from a tyre company regarding correct tyre and wheel sizing. Incorrect sizing may cause interference with vehicle components.

Installation Responsibility

Kut Snake products must be installed by a licensed and authorised professional. Any self-installation or installation by an unauthorised individual will void the warranty.

Compliance with Laws

It is the responsibility of the vehicle's owner to comply with all applicable state laws, by-laws, and vehicle regulations, including the Road Traffic Act. Once a vehicle is modified, Kut Snake cannot guarantee the accessories will remain legally compliant.

Product Purpose

Kut Snake ABS plastic flares are designed solely to provide coverage for wider tyres. They are not intended to provide impact protection or serve as structural reinforcement, bumper replacements, or panel protection.

Acceptance of Terms

By receiving and/or installing a Kut Snake flare kit, you acknowledge that you have read, understood, and agreed to the terms and conditions. These terms and conditions are provided in writing with each product sold and can also be accessed via the Kut Snake website.

Website Information Disclaimer
